

**Engine Starting Chargers**

**Series IIIB**

Designed for harsh environmental conditions, the Magellan Power Series IIIB battery charger combines rugged SCR power circuitry with intelligent control electronics to produce an efficient, cost effective, highly reliable, safe and almost indestructible charger for vented and sealed lead acid batteries. Featuring low output ripple, LCD Displays - for both voltage *and* current - and voltage alarms, the Magellan Power Series IIIB battery charger is ideal for many applications.

**Product Features**

- Current Limit
- Low output ripple
- ±1% output regulation
- High reliability
- LCD Charger Voltage
- LCD Charger Current
- Hi Volts/Lo Volts Alarm
- Volt-Free Alarm Contacts

**Specifications**

Nominal Output	24V
Output Current	15V
Float Voltage	27.6V
Metering	LCD Voltmeter LCD Ammeter
Alarm	Low Volts/High Volts
Indication	Low Volts/High volts
Remote Alarm	Volt Free Changeover Contacts
Protection	Short Circuit
Input Voltage	240V AC ± 10% 50Hz
EMC Standards	AS 2064-1997
Working Temp.	-10°C to 60°C
IP Rating	IP20
Dimensions	200mm (H) x 350mm (W) x 160mm (D)
