subject : Letter of Reference for Magellan Powertronics

To Whom it May Concern,

Schneider Electric Engineered Services Western Australia have been purchasing equipment from Magellan Powertronics for several years. The Western Australian Projects team have been involved with ordering battery charger cabinets and dc supplies for the Ravensthorpe Nickel Project, Perth Desalination Plant, Technip Oceania Otway Gas Project and Alinta Wagerup OCGT Switchrooms.

The Projects team have found the equipment and material supplied by Magellan to be of consistently high standards and compliant with client specifications and Australian Standards. Manufacturing time has met the periods quoted for at tender and product is always delivered suitably packed and sealed for transport.

Magellan staff have been eager to assist and readily available to answer technical queries and come up with design modifications to fit changing client's needs.

Schneider Electric Engineered Services have no hesitation in recommending the services of Magellan Powertronics and their Business Development Manager Khawar Durrani for battery charger and power supply requirements.

Regards,

Fiona Franz

Project Engineer
