To Whom It May Concern

LETTER OF REFERENCE FOR MAGELLAN POWERTRONICS

Alinta Asset Management, Tasmania has over recent years purchased significant quantities of DC supply and back-up systems from Magellan Powertronics. This has in general comprised of Magellan's in-house manufactured chargers, enclosures and batteries supplied to them.

We have found the materials supplied by Magellan to be of a consistently high standard, meeting and exceeding our requirements in most instances.

Of the 125Volt DC systems installed to date, their equipment has been exceptionally reliable with no down time attributed to them that I am aware of.

When situations have arisen where we have required urgent support, Magellan has consistently gone out of their way to accommodate our requirements.

Magellan are most proficient in supplying equipment and as when requested information. Their after sales service has been excellent without exception.

I would have no hesitation in recommending Magellan Powertronics (Magellan Energy), their Company Director, Masoud Abshar and his competent friendly staff to anyone requiring their services.

Sincerely

J. Lamprecht

John Lamprecht.
Senior Project Manager.
Alinta Asset Management.
